

One Contact, One Contract

LG Energy Solution Vertech, the US energy storage division of LG Energy Solution, delivers integrated, reliable, and bankable energy storage systems and services, delighting our customers and creating a sustainable world.

Our close connection with our parent company, LG Energy Solution, is at the core of our vertically integrated approach and enables us to provide customers with a streamlined project experience. With LG Energy Solution, we offer advanced hardware products, technical and financial support, and commercial guarantees while ensuring battery availability for our customers' delivery requirements.

US-based employees including engineering and service teams

Your Lifetime Energy Storage Partner

Vertically Integrated Approach

We are one of the only providers of comprehensive, in-house integrated energy storage solutions. Our connection with our customers begins at project planning and continues through the life of the project. From cell manufacturing through system integration, O&M services, and warranties, complete energy storage systems are delivered through a US-based single point of contact.

Domestically Made and Serviced

We are committed to the US market. In mid-year 2025 we will begin delivering storage systems from our advanced manufacturing facilities in the US, leveraging a localized supply chain. With our system integration, software engineering, and O&M teams already based in the US, we can support customers and maximize access to US tax credit benefits.

Committed to Safety

Safety is paramount in every part of our systems which are designed for tomorrow's rigorous safety codes and standards, streamlining the permitting and approval processes. Safety is also inherent to the AEROS™ software suite, with predictive analytics tools and early detection alerts that avoid costly unplanned outage events.

Complete Energy Storage Solutions

Our integrated energy storage systems are developed in partnership with our parent company, LG Energy Solution. By integrating hardware provided by LG Energy Solution and supporting systems with lifecycle services, long-term warranties, and our AEROS™ software suite, we offer customers complete solutions through one contact, and one contract.
